BookingGPT Partners

Dev Spec — Launch Version

InsiderBookings LLC • For: Dev Team • March 2026 • Build what is in this doc. Everything else comes later.

NOTE: This doc covers only what is needed to launch and start getting hotels signed up. Advanced features like admin panel and deals section come in a later version.

Contents

1.	**What to Build**	Overview of all components
2.	**Badge System**	Three badge types, colors, hex codes, rules
3.	**Badge Display in the App**	Screenshots and placement specs
4.	**Hotel Claim Flow**	Step-by-step from landing page to trial start
5.	**Automated Email Sequence**	All 11 emails + manual call schedule
6.	**Hotel Dashboard**	Sections and what each hotel sees
7.	**Stripe Setup & Payment Options**	Plans, card payment, invoice option, plan switching
8.	**Build Checklist**	P0 launch items vs P1/P2 post-launch

1. What to Build

Two things need to be built. A page on the BookingGPT website where hotels claim their listing. And badge display inside the BookingGPT mobile app where travelers search for hotels.

What	Where	Priority
Hotel claim and dashboard page	bookinggpt.app/partners — website, desktop only	Launch now
Badge display on hotel cards	BookingGPT mobile app — iOS and Android	Launch now
Stripe payment setup	Stripe dashboard + backend connection	Launch now
Automated email sequence	Email system — sends automatically based on day	Launch now
Admin panel for Nahyan	bookinggpt.app/partners/admin	After launch
Deals and offers section	Hotel dashboard — Preferred and Featured only	After launch

2. Badge System

Every hotel has a badge field. The badge shows on their hotel card in the app. No badge means no chip shown — the card looks normal. Badges are assigned based on which plan the hotel is paying for.

Badge	Color	Hex Code	Plan	Price	How Assigned
Verified	Green	#22C55E	Starter	$49/mo	Hotel pays after trial
Preferred	Blue	#1877F2	Pro	$99/mo	Hotel pays after trial
Featured	Purple	#7B2FBE	Elite	$249/mo	Hotel pays after trial — also free during 30-day trial

Badge Rules

During the 30-day free trial — hotel gets the Featured purple badge for free, no payment needed

After trial ends — hotel must choose a paid plan to keep any badge

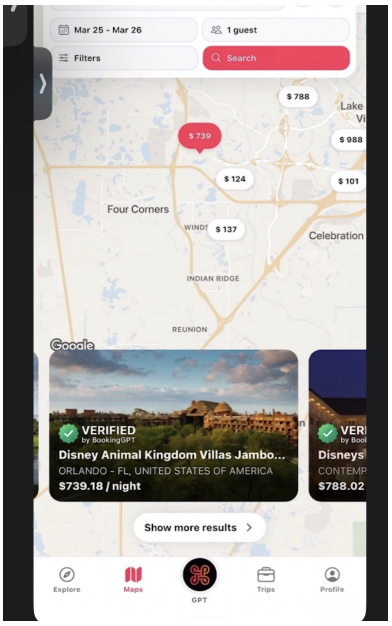
If hotel does not pay — all badges removed, listing stays in system but no badge, no label

Search order: Featured first, then Preferred, then Verified, then no badge

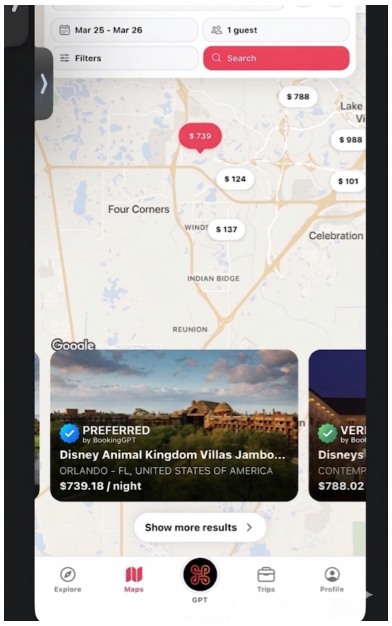
NOTE: Never show the word Unverified anywhere. Hotels without a badge simply have no badge. Clean and neutral. Paid hotels look better. Free hotels do not look bad.

3. Badge Display in the App

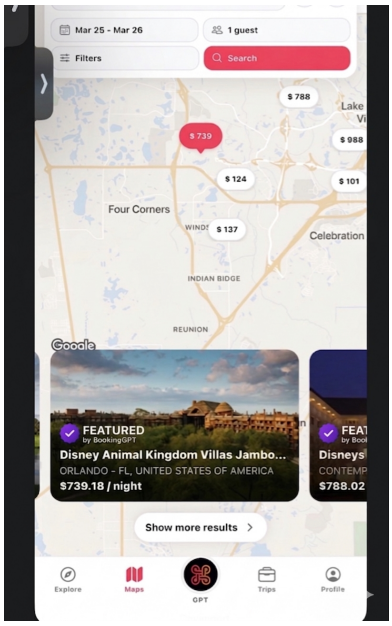
The badge sits in the bottom-left corner of each hotel card photo. Below are the three badge types as they appear in the app today.



■ Verified — $49/mo — #22C55E



■ Preferred — $99/mo — #1877F2



■ Featured — $249/mo — #7B2FBE

Badge Rules for the App

Format: colored circle with checkmark + badge name in bold white caps + 'by BookingGPT' underneath

No badge = no chip rendered at all, card looks completely normal

Featured hotel card gets a subtle colored border or glow effect

Search results ordered: Featured first, then Preferred, then Verified, then no badge

4. Hotel Claim Flow — bookinggpt.app/partners

No credit card needed to claim. Hotel goes through a simple flow, gets Featured badge free for 30 days, then chooses a plan at the end. Price is never shown until day 25.

Step	What Happens
1 — Landing page	Hotel sees: Your hotel is already on BookingGPT. Claim it free. One button: Claim My Hotel
2 — Search	Hotel types their hotel name. System searches the database and shows their hotel.
3 — Confirm	Hotel clicks: Yes, this is my hotel.
4 — Create account	Email and password only. No credit card. No payment info.
5 — Fill profile	Hotel name is pre-filled. They add photos, description, amenities, contact info.
6 — Trial starts	Featured purple badge goes live on their hotel card in the app immediately. Welcome email sent.
7 — Day 25	Email sent: Your trial ends in 5 days. Choose your plan to keep your badge. Link to plan page.
8 — Day 27	Urgent email sent. Nahyan or Norman calls the hotel directly.
9 — Day 28	Final warning email. Second call attempt.
10 — Day 30	Badge removed automatically. Email sent: Your badge has been removed. Third call attempt.
11 — Hotel chooses plan	Hotel picks Verified $49, Preferred $99, or Featured $249. Enters card. Badge restored instantly.
12 — Day 32	Follow up email and call if still no response.
13 — Day 37	Final email and call. After this, no more outreach.
14 — No response	Hotel stays in system forever with no badge. Can upgrade anytime they log back in.

5. Automated Email Sequence

All emails below are sent automatically by the system. Calls are made manually by Nahyan or Norman.

Day	Type	What It Says	Sent By
Day 1	Email	Welcome. Your Featured badge is live. Here is your dashboard link.	System
Day 7	Email	Week 1 report. Your views and clicks this week.	System
Day 14	Email	Week 2 report. Your views and clicks this week.	System
Day 15	Email	You are halfway through your trial. Here is what you have gotten so far.	System
Day 21	Email	Week 3 report. Your views and clicks this week.	System
Day 25	Email	Trial ends in 5 days. Choose your plan to keep your badge.	System
Day 27	Email + Call	3 days left. Your badge disappears soon. Nahyan or Norman calls.	System + Manual
Day 28	Email + Call	Tomorrow your badge disappears. Last chance. Second call attempt.	System + Manual
Day 30	Email + Call	Your badge has been removed. Restore it here. Third call attempt.	System + Manual
Day 32	Email + Call	Your hotel is still on BookingGPT without a badge. Restore it.	System + Manual
Day 37	Email + Call	Last message. Your badge is waiting. Final call. Then stop.	System + Manual

NOTE: If hotel upgrades at any point — stop all emails and calls immediately. Send one confirmation email welcoming them to their chosen plan.

6. Hotel Dashboard

After claiming, hotel owners log in at bookinggpt.app/partners to manage their listing. Desktop only — no mobile needed.

Section	What the Hotel Sees
Overview	Current badge, plan name, days left in trial or next billing date
Analytics	Views this week, clicks this week, search appearances, percentage change vs last week
Profile Editor	Hotel name, description, photos upload, amenities checklist, contact info
Subscription	Current plan, next billing date, button to upgrade or cancel
Support	Email link to contact BookingGPT team

NOTE: After trial ends with no payment — show a full-width red banner at top of dashboard: Your badge has been removed. Restore it here. Button: Restore My Badge.

7. Stripe Setup & Payment Options

Three plans in Stripe. Monthly billing only. No card collected during the claim flow — card or invoice details are only entered when hotel chooses a plan at day 25-30.

Plan	Badge	Price	Billing
Starter	Verified — Green	$49.00	Monthly — charged when hotel selects this plan
Pro	Preferred — Blue	$99.00	Monthly — charged when hotel selects this plan
Elite	Featured — Purple	$249.00	Monthly — charged when hotel selects this plan

Payment Options — Two Buttons on Plan Selection Page

When hotel selects a plan, show two payment options side by side:

Button	Label	What Happens	Badge Activates
Primary	Pay by Card	Stripe checkout opens. Hotel enters card. Charged immediately.	Instantly on payment
Secondary	Request Invoice	Simple form: name, email, billing address. Stripe invoice sent by email. Hotel pays via link or bank transfer.	Only after payment confirmed — NOT on request

Invoice Payment — Who Activates the Badge

Card payment — badge activates automatically when Stripe confirms payment

Invoice payment — Nahyan activates the badge manually after confirming payment received

Hotel receives a confirmation email when badge is activated

Badge is NEVER activated on invoice request alone — only on confirmed payment

Plan Switching

Hotels can upgrade or downgrade their plan at any time

Change takes effect at the start of the next billing cycle — not immediately

Badge updates to new tier at the start of the next cycle

If hotel upgrades to a higher plan — new badge shows from next billing date

If hotel downgrades — current badge stays until end of current billing period

Other Stripe Rules

Payment fails — 3-day grace period, then badge removed until payment succeeds

Hotel cancels — badge removed at end of current billing period

Stripe customer portal — hotel can manage card, see invoices, cancel without contacting support

Support contact — email only, link shown in dashboard Support section

8. Build Checklist — Launch Only

Build only these items to launch. Everything else comes after hotels are signing up.

Priority	What to Build
P0 — Day 1	Hotel claim page with hotel search and account creation
P0 — Day 1	Badge field added to hotel listing in the database
P0 — Day 1	Badge displayed on hotel cards in the mobile app — see screenshots in Section 3
P0 — Day 1	Featured badge activates automatically the moment a hotel claims
P0 — Day 1	Three Stripe plans — Starter $49, Pro $99, Elite $249 — monthly billing only
P0 — Day 1	Plan selection page at day 25 with two payment buttons: Pay by Card and Request Invoice
P0 — Day 1	Pay by Card — Stripe checkout, badge activates automatically on payment
P0 — Day 1	Request Invoice — collect name, email, billing address, send Stripe invoice by email
P0 — Day 1	Invoice badge activation — manual by Nahyan after confirming payment received
P0 — Day 1	Badge updates to chosen plan on payment, removed if no payment after trial
P0 — Day 1	Search results ordered by badge — Featured first, then Preferred, Verified, then no badge
P1 — Week 1	Hotel dashboard — analytics, profile editor, subscription tab, support email link
P1 — Week 1	Full automated email sequence — day 1, 7, 14, 15, 21, 25, 27, 28, 30, 32, 37
P1 — Week 1	Red upgrade banner in dashboard after trial ends with no payment
P1 — Week 1	Stripe customer portal link in dashboard for self-serve subscription management
P2 — After launch	Admin panel — view all hotels, manually activate badges for invoice payments
P2 — After launch	Deals and offers section in dashboard for Preferred and Featured only
