Maxi — Hotel Partners Plan Update

Updates to the existing Partners dev spec. Build these on top of what is already specced. Everything here is new or changed.

Stripe Plan Names — Fix

Remove Starter, Pro, Elite everywhere — Stripe dashboard, emails, dashboard UI, code variables. Replace with badge names only.

Remove	Replace With	Price
Starter	Verified	$49/mo
Pro	Preferred	$99/mo
Elite	Featured	$249/mo

What Each Tier Includes — Final Feature List

Tier	Features Included
Verified $49/mo	• Verified badge on hotel card in app • Listed in BookingGPT search results • Basic profile — photos, description, amenities, contact • Weekly stats email — views and clicks
Preferred $99/mo	• Everything in Verified • Ranks above Verified hotels in search • Full profile editor • Booking inquiry button — travelers message hotel directly • Response time badge — displays on listing • Special offers text field on listing • Included in BookingGPT destination emails to travelers
Featured $249/mo	• Everything in Preferred • Top of all search results • Monthly PDF performance report auto-emailed • Dedicated account manager — direct contact with team • Review boost — post-stay Google review prompt to guest • Competitor insights — views/clicks vs similar hotels in city • Upsell capability — early check-in, packages, upgrades. Hotel keeps 100%. No fees or commission.

Verification Code System — New Build

Hotels receive a physical verification letter in the mail. They visit bookinggpt.app/verify, enter their unique code, create an account, and their Featured badge activates immediately. Keep bookinggpt.app/partners working too — both routes lead to same trial start.

Item	Spec
Code format	VRF + 4 random numbers + 1 random letter. Example: VRF4821K. Unique per hotel.
New page	bookinggpt.app/verify — hotel enters code, creates account, badge activates
Code storage	Generated per hotel, stored in system, matched on entry
Code expiry	No expiry — works anytime

Dashboard — Updated Metric

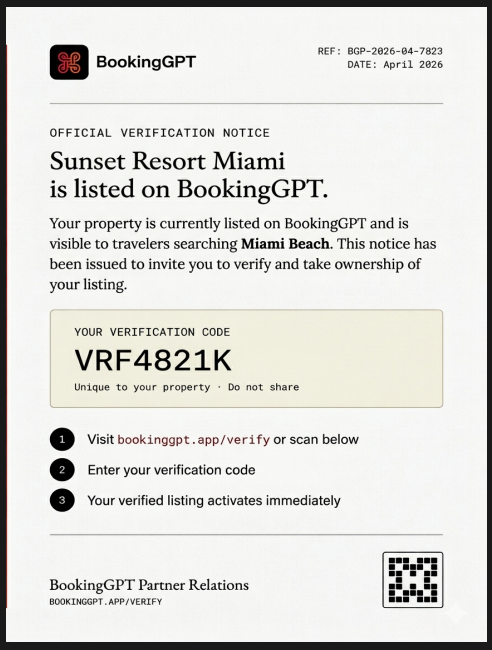
Item	Spec
Old label	Views
New label	BookingGPT Reach
Subtext	Travelers who saw your hotel across BookingGPT this week
Source	In-app views tracked automatically + manual social views added by admin weekly. One combined number. No breakdown shown to hotel.

New UI Builds Per Tier

Build	Tier	Notes
Soft pressure — "X travelers viewed today"	All	Simple counter on hotel listing page in app
Booking inquiry button	Preferred+	Traveler sends message to hotel email — name, dates, message
Response time badge	Preferred+	Hotel sets in dashboard. Shows on listing as "Responds within X hours"
Special offers field	Preferred+	Text field in dashboard. Highlighted line on listing.
Review boost	Featured	Post-checkout auto email to guest — Google review link for that hotel
Competitor insights	Featured	Average views/clicks for similar hotels in city vs theirs. No hotel names — averages only.
Monthly PDF report	Featured	Auto-generated PDF — monthly Reach, views, clicks, week over week. Emailed 1st of month.

How Hotels Enter the System — The Verification Letter

Every hotel GM receives a physical verification letter in the mail addressed to them by name. The card below is what they receive inside the envelope. Everything that follows is automated.



BookingGPT
